Preliminary Amendment Acknowledgement

Acknowledgment is made of Preliminary Amendment filed on 4/18/2002, in which original claims 1-10, were canceled and new claims 11-24 (Rule 1.26) were added.

Allowable Subject Matter

Claims 11-24 (Rule 1.26) are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claim 11, more particularly define the method of selecting a storage medium (disk) from a plurality of storage medium in a playback apparatus. The method comprise the step of determining a playback probability as a function of a time assigned to the playback apparatus for a respective disk for reading and reproducing. The time is longer for a lower playback probability for the respective disk. The time is calculated individually for each disk and used in calculating playback probability. The method includes realizing a disk with lowest playback probability for ejection form the apparatus. These particulars combined with remaining claim elements are not suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Blakeway et al in US 5,185,727, disclose a disk changer wherein a playback probability is established for each disk and when the disk has to be removed the one with lowest probability is extracted. However the playback probabilities of the disks are all calculated over the same period (since the previous inspection).
